ACKNOWLEDGMENT

I am deeply thankful to my supervisor, Dr Heba Raouf, whose continuous guidance, encouragement and support from the beginning enabled me to develop an understanding of the subject. It is an honor for me to be her student as this thesis would not have been possible unless her acceptance to be my supervisor.

Also, I owe my deepest gratitude to Dr Ibrahim El Nur who made this thesis possible as he offered his support in a number of ways throughout my study. I am extremely grateful to him and I appreciate all his efforts.

I would like also to thank Dr Reham Bahi for her support and guidance.

I am indebted to my lovely Mother, brothers and sister for their continuous support and I do appreciate their efforts so much. Without their support things would not have been possible.

Finally, It is a pleasure to thank my dear friends and to all those who supported me to come up with my thesis.
DEDICATION

I would like to dedicate my thesis to my lovely Mother who supports me in everything in my life.
